Excels in environments that constantly present new challenges.

Skills include:

HTML / CSS / React / Next / Redux / TypeScript / JavaScript / GraphQL / PostgreSQL / Amazon Web Services / Testing & Debugging / Project Management

EXPERIENCE

LandTrust - The Recreational Access Network

Software Engineer I - Remote

June 2023 - Present

- Developed a premium subscription service featuring a dynamic social feed with automated property updates, landowner-generated posts, custom notifications, a checkout page, a sales page, and more. This feature became one of the most widely used components of the application, driving significant revenue growth.
- Developed a new homepage with sections that display packages based on the users' geolocation, recently viewed packages using local storage, and the latest property updates posted by landowners.
- Created a system to effectively manage and decrease the frequency of incoming bugs, significantly reducing technical debt and clearing a backlog of hundreds of bugs and feature improvements.
- Managed our technical infrastructure by monitoring service costs and enforcing best practices to ensure optimal application performance and efficiency.
- Owned projects from inception to deployment, overseeing shaping, technical validation, development, and final release.

ByteSpeed

Focus Group Coordinator – Moorhead, MN

August 2019 - February 2020

- Led a 20-person focus group, including professors and teachers, to provide foundational training in virtual reality programs.
 - Managed resources and collected feedback to drive the development of virtual reality solutions customized for our clients.
 - Delivered clear, well-organized feedback reports to various VR companies, offering valuable, actionable insights.
-

EDUCATION

Emerging Digital Academy

November 2022 - May 2023

- Developed a secure application to track earnings reports of 2,500 companies, displaying real-time price changes and up-to-date news reports using third-party APIs.
- Presented my application to an audience of over 30 people, providing a detailed walkthrough of its features, technical implementation, and real-world applications for financial analysis.
- Developed a task management system for a nonprofit organization, which drastically increased efficiency, workflow, and organization for their business.

North Dakota State University - Undergraduate Finance
